

Automatic Cupping Tester

The punch on this Automatic Cupping Tester can rise automatically at the speed of 0.2mm/s as required by some standards. This eliminates errors caused by hand lifting.

In addition, it has a high-definition screen, clearly showing the damage (cracking) from tested samples, making it easier to read and judge test results.

Key Features

Product Code T01-700016

Relevant Standards: ISO 1520 BS 3900 Part 4 DIN 53166 DIN 53233 Automatic

punch lift (Constant speed: 0.2mm/s)

Automatic coordinate positioning system

High-power magnifier and high-definition screen

Max. width of test panel = 90mm

Diameter of punch: 20mm (0.8 inch)

Maximum dent depth: 18mm

Weight: 20Kg,

Dimensions: 230×300×280mm (L×W×H)
