

Levelling Tester

The Levelling Tester is designed to determine the relative levelling of liquid coating materials before curing in the laboratory. (Coating materials have to eliminate surface defect during drying). It complies with ASTM D2801-1994 (T01-700133) and NYPC (T01-700134)

It is made of stainless steel with a straight scraper fitted with 5 pairs of notches of increasing depth from 100~1000 μ m (or 250~4000 μ m).

Once the drawdown has been made on a horizontal, firm surface, leave the coating to cure. Once the coating is dry, identify the thickness at which the pair of film stripes merge.

Product Code	Coating Thickness	Dimensions	Weight
T01-700133	100-200-300-500-1,000 μ m	120 \times 20 \times 20mm	0.3 Kg
T01-700134	10-20-40-80-160 mils	120 \times 20 \times 20mm	0.3 Kg
