

## Sag and Levelling Test Charts

These Sag and Levelling Test Charts are specially designed for use with our sag testers and levelling testers. The extra-large black area allows measurements to be made over the black area only, in accordance with specifications that specify to ignore the leading and trailing edges of the drawdown.

Ideal for a wide range of coating systems: water and solvent based. Guaranteed non-fluorescent paper in compliance with ASTM D 344, Repeatable colour, and gloss-lot after lot. Superior adhesion characteristics especially with latex paints. Strong (0.5 mm thickness) to prevent warping and bending. Pack of 500
