

## Falling Sand Abrasion Tester

Falling Sand Abrasion Tester is designed according to ASTM D 968. It is used to determine the abrasion resistance performance of organic coatings. Abrasive (sand) is allowed to fall from a specified height through the guide tube onto a coated panel until the substrate becomes visible.

The amount of abrasive per unit film thickness is reported as the abrasion resistance of the coating on the panel.

Product Code	T01-700723
Description	Falling Sand Abrasion Tester
Overall Dimensions	200 x 230 x 1500 mm (L x W x H)
Length of guide tube	914mm (36")
Inner Diameter of Guide Tube	19mm (0.75")
Volume of Hopper	3L
Unpacked weight	25 kg
